

```
In [1]: # yes you can change the List data
```

```
In [2]: # suppose i have a List as given below
```

```
In [3]: list=['zohaib',5]
```

```
In [5]: # then if i want to change zohaib to ali and 5 to 7 then firdtly i will use remo
```

```
In [8]: list.remove("zohaib")
```

```
In [9]: # u will see that the value i write within these brackets will removed from the
```

```
In [11]: print(list)
```

```
[5]
```

```
In [14]: # now we will use insert function      # in insert fun we will first put index no
```

```
In [15]: list.insert(0,"ali")
```

```
In [16]: # now our list is
```

```
In [17]: print(list)
```

```
['ali', 5]
```

```
In [ ]: # if u dont understand the index no then i will show you  
# suppose i have a List  
l=[1,2,3,4] #then index no is  
#index=0,1,2,3  
# here 0 is index of 1  
#1 is index of 2 and so on.
```
